

PHISH-E The Ultimate Phishing Simulation Tool

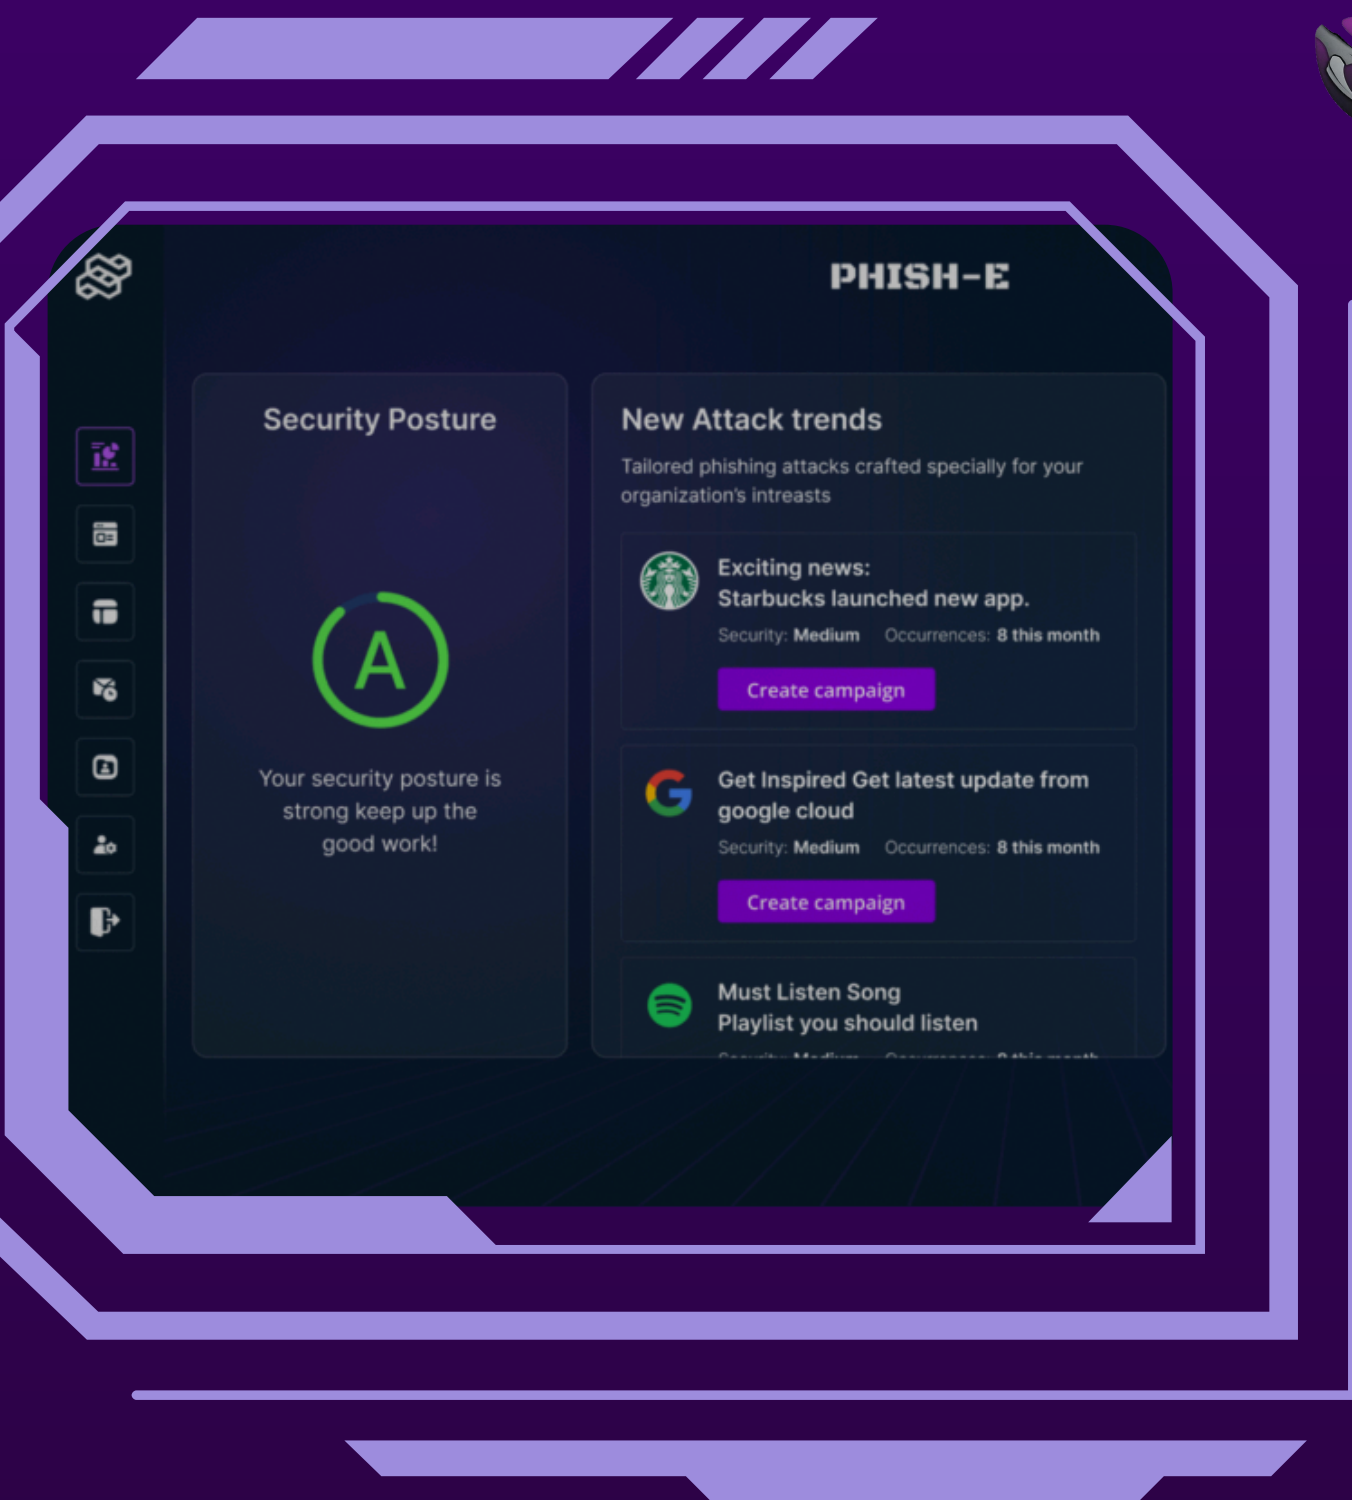

An AI-Enabled, Sentiment Driven
Phishing Simulation Tool

Empower with Phish-E

Phishing attacks have evolved over the years, becoming increasingly sophisticated and harder to detect. With state-of-the-art defense systems deployed, human risk is still there. Generic phishing simulations are no longer effective to save your organization from a human-enabled data breach.

Introducing Phish-E is an AI-Enabled fully automated phishing simulation tool customized for your industry with latest attack trends and smart sentiment based templates. The realistic scenarios prepare your team for the most current threats, ensuring they are always ready to recognize and respond to phishing attempts.

Why Phish-E?

1. Result Driven

We guarantee a minimum 20% phish-rate in initial simulations and 80% reduction within 6 months of deployment

2. Cost Effective

Compared to other phishing simulation solutions in the market with similar features, we aim to reduce your cost by half.

3. Secure you from

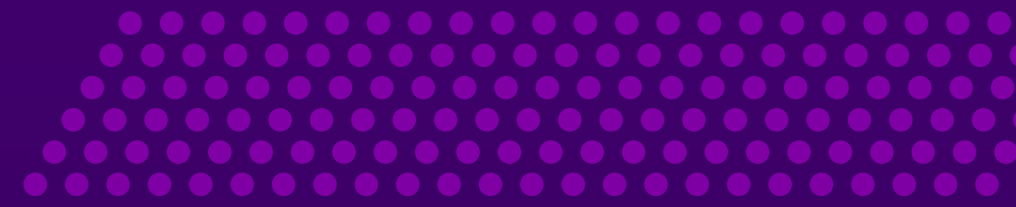

CEO-fraud, BEC, credential theft, spear phishing, malware and malicious attachments, ransomware, QR based phishing and wide range of phishing attacks.

4. Time and Resource Efficient

With out smart templates, easy AD integration and existing landing page templates, launch a campaign within 30 sec.

FEATURES

- 
AI-Enabled Sentiment Analysis
 Enhance phishing simulations with AI-driven sentiment analysis, enabling better insights into users' emotional and behavioral responses and tailor training and awareness programs
- 
Valuable Reporting Insights
 Gain invaluable insights with comprehensive reporting, including in-depth analysis by interaction type, campaign, date, and user behavior, enabling informed decision-making
- 
Real-Time Out-of-the-Box Dashboards
 Gain instant visibility into your phishing campaign performance with real-time dashboards and receive notifications on major platforms like Slack, Telegram, and Discord for immediate access to critical insights.
- 
AI-Driven Smart Templates
 Utilize smart templates based on the latest phishing attack vectors, preparing your organization for current sophisticated threats with customizable templates and variable difficulty levels for simulations.
- 
Launch Campaign in Under 30 Seconds
 Automated onboarding through active directory integration, easy customization of landing pages, and minimal setup make Phish-E a cost-effective tool for quick campaign launches.
- 
Customized Industry Templates
 Tailored templates and training specific to your industry, ensuring phishing campaigns are highly relevant and addressing your unique challenges and regulatory requirements.

PLANS

Standard

Meant for smaller organizations with basic requirements

- Phishing Simulation
- Training Campaign & Modules
- Risk Scoring, Reports & Analytics
- Interactive training module
- AI-Enabled Sentiment Analysis
- Customizable Landing Pages
- Smart Templates
- 2-FA Bypass
- Industry tailored phishing insights
- Macro Phishing
- Rapid Feature Development
- Phish-Assist
- Active Directory Integration
- Sophisticated Bypasses
- QR Based Phishing
- Real Time Notification

Professional

Meant for medium or large sized organizations with advanced requirements

- Phishing Simulation
- Training Campaign & Modules
- Risk Scoring, Reports & Analytics
- Interactive training module
- AI-Enabled Sentiment Analysis
- Customizable Landing Pages
- Smart Templates
- 2-FA Bypass
- Industry tailored phishing insights
- Macro Phishing
- Rapid Feature Development
- Phish-Assist
- Active Directory Integration
- Sophisticated Bypasses
- QR Based Phishing
- Real Time Notification

Enterprise

Meant for enterprise level customers with highly automated environments

- Phishing Simulation
- Training Campaign & Modules
- Risk Scoring, Reports & Analytics
- Interactive training module
- AI-Enabled Sentiment Analysis
- Customizable Landing Pages
- Smart Templates
- 2-FA Bypass
- Industry tailored phishing insights
- Macro Phishing
- Rapid Feature Development
- Phish-Assist
- Active Directory Integration
- Sophisticated Bypasses
- QR Based Phishing
- Real Time Notification
